# IMPORTANT INFORMATION

DATA AS OF DECEMBER 31, 2020

Current performance may be higher or lower than the performance stated due to recent stock market volatility. The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate and there is no assurance that the objective of any funds will be achieved. Mutual fund shares are redeemable at the then current net asset value and may be worth more or less than their original cost.

The current 7-day yield as of December 31, 2020 for INVESCO GOVT & AGENCY POR INST is 0.03%. This yield more closely reflects the current earnings of the money market fund than does the total average annual return. Yields do not reflect deduction of surrender charges or premium taxes, if applicable. You could lose money by investing in the Money Market Fund (Fund). Although the Fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the Fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Fund' s sponsor has no legal obligation to provide financial support to the Fund, and you should not expect that the sponsor will provide financial support to the Fund at any time.

#### Important Information regarding Morningstar Ratings/Rankings:

Mutual funds are classified according to Morningstar. Morningstar measures risk-adjusted returns and ratings reflect historical risk-adjusted performance. Morningstar % Rank in Category is the fund's total-return percentile rank relative to all funds that have the same category for the same time period. The highest (or most favorable) percentile rank is 1, and the lowest (or least favorable) percentile rank is 100.

#### **Important Risk Disclosures**

Past performance is not a guarantee of future results. Investing involves risk, including the possible loss of principal. Generally, higher potential returns involve greater risk and short-term volatility. For example: Small-cap, mid-cap, sector and emerging funds can experience significant price fluctuation due to business risks and adverse political developments.

International and global funds can experience price fluctuation due to changing market conditions, currency values, and economic and political climates.

High-yield bond funds, which invest in bonds that have lower ratings, typically experience price fluctuation and a greater risk of loss of principal and income than when investing directly in U.S. government securities such as U.S. Treasury bonds and bills, which are guaranteed by the government for repayment of principal and interest if held to maturity.

Interest rates and bond prices typically move inversely to each other; therefore, as with any bond fund, the value of an investment in this fund may go up if interest

# IMPORTANT INFORMATION

AIG

DATA AS OF DECEMBER 31, 2020

rates fall, and vice versa.

Mortgage-related funds' underlying mortgages are more likely to be prepaid during periods of declining interest rates, which could hurt the fund's share price or yield and may be prepaid more slowly during periods of rapidly rising interest rates, which might lengthen the fund's expected maturity. Investors should carefully assess the risks associated with an investment in the fund. Fund shares are not insured and are not backed by the U.S. government, and their value and yield will vary with market conditions.

The principal value of an investment in a target date fund is not guaranteed at any time including at or after the target maturity date. The target date is the approximate date when investors plan to start withdrawing their money. The fund will gradually shift its emphasis from more aggressive investments to more conservative ones based on its target date.

Investors should carefully consider the investment objectives, risks, fees, charges and expenses before investing. This and other important information is contained in the prospectus, which can be obtained from your service representative or by logging in to SponsorFIT at aig.com/RetirementServices. If you do not have access to SponsorFIT, go to aig.com/RetirementServices and click on SponsorFIT Access. Follow the prompts to create a user ID and password. Read the prospectuses carefully before investing.

Securities and investment advisory services offered through VALIC Financial Advisors, Inc. ("VFA"), member FINRA, SIPC and an SEC-registered investment advisor.

Bloomberg Barclays U.S. Treasury Bill 1-3 Month Index: Bloomberg Barclays U.S. Treasury Bill 1-3 Month Index is an unmanaged index considered representative of short-term US corportate and US government bonds with maturities of one to three years.

Bloomberg Barclays U.S. Treasury TIPS Index: Bloomberg Barclays US Treasury Inflation-Linked Bond Index (Series-L) measures the performance of the US Treasury Inflation Protected Securities (TIPS) market.

Bloomberg Commodity Index: Bloomberg Commodity Index (BCOM) is calculated on an excess return basis and reflects commodity futures price movements

BofAML All Convertibles Index: BofAML All Convertibles Index consists of convertible bonds traded in the U.S. dollar denominated investment grade and non investment grade convertible securities sold into the U.S. market and publicly traded in the United States

BofAML Preferred Stock Fixed Rate Index: BofAML Preferred Stock Fixed Rate Index is designed to replicate the total return of a diversified group of investment grade preferred securities.

Credit Suisse Leveraged Loan US: Credit Suisse Leveraged Loan Index is a market-weighted index that tracks the performance of institutional leveraged loans.

FTSE 3-Month Treasury Bill: FTSE 3-Month Treasury Bill Index is an unmanaged index composed of three month Treasury bills

FTSE EPRA Nareit Developed NR: FTSE EPRA/Nareit Developed Index is a free-float adjusted, market capitalization-weighted index designed to track the performance of listed real estate companies in developed countries worldwide

JPM GBI-EM Global Diversified TR USD: JPM GBI-EM Global Diversified TR USD is an unmanaged, market-capitalization weighted, total-return index tracking the traded market for U.S.-dollar-denominated Brady bonds, Eurobonds, traded loans, and local market debt instruments issued by sovereign and quasi-sovereign entities.

MSCI AC Asia Pacific ex-Japan Index: MSCI AC Asia Pacific ex Japan Index captures large and mid cap representation across 4 of 5 Developed Markets countries\* (excluding Japan) and 9 Emerging Markets countries\* in the Asia Pacific region

# IMPORTANT

DATA AS OF DECEMBER 31, 2020

MSCI AC Asia Pacific Index: MSCI AC Asia Pacific Index captures large and mid cap representation across 5 Developed Markets countries<sup>\*</sup> and 9 Emerging Markets countries<sup>\*</sup> in the Asia Pacific region. With 1,587 constituents, the index covers approximately 85% of the free float-adjusted market capitalization in each country.

MSCI ACWI ex-US Index: MSCI ACWI ex USA Index captures large and mid cap representation across 22 of 23 Developed Markets (DM) countries (excluding the US) and 26 Emerging Markets (EM) countries\*

MSCI ACWI NR Index: MSCI ACWI NR Index is designed to represent performance of the full opportunity set of large- and mid-cap stocks across 23 developed and 26 emerging markets.

MSCI ACWI Small Index: MSCI ACWI Small Cap Index captures small cap representation across 23 Developed Markets (DM) and 26 Emerging Markets (EM) countries\*. With 5,929 constituents, the index covers about 14% of the free float-adjusted market capitalization in each country

MSCI China Index: MSCI China Index is constructed based on the integrated China equity universe included in the MSCI Emerging Markets Index, providing a standardized definition of the China equity opportunity set. The index aims to represent the performance of large- and mid-cap segments with H shares, B shares, red chips, P chips and foreign listings (e.g., ADRs) of Chinese stocks.

MSCI EAFE: MSCI EAFE Index is designed to represent the performance of large and mid-cap securities across 21 developed markets, including countries in Europe, Australasia and the Far East, excluding the U.S. and Canada. It covers approximately 85% of the free float-adjusted market capitalization in each country.

MSCI EAFE GROWTH Index: MSCI EAFE Growth Index captures large and mid-cap securities exhibiting overall growth style characteristics across Developed Markets countries\* around the world, excluding the US and Canada.

MSCI EAFE VALUE Index: MSCI EAFE Value Index captures large and mid-cap securities exhibiting overall value style characteristics across Developed Markets countries\* around the world, excluding the US and Canada.

MSCI Emerging Markets (EM) Latin America Index: MSCI Emerging Markets (EM) Latin America Index captures large and mid cap representation across 6 Emerging Markets (EM) countries<sup>\*</sup> in Latin America. With 112 constituents, the index covers approximately 85% of the free float-adjusted market capitalization in each country

# IMPORTANT

DATA AS OF DECEMBER 31, 2020

MSCI Emerging Markets Index: The MSCI Emerging Markets Index is a free float-adjusted market capitalization index that is designed to measure equity market performance of emerging markets.

MSCI Europe Index: MSCI Europe Index captures large and mid-cap representation across 15 Developed Markets (DM) countries in Europe\*. With 437 constituents, the index covers approximately 85% of the free float-adjusted market capitalization across the European Developed Markets equity universe

MSCI India Index: MSCI India Index is designed to measure the performance of the large and mid-cap segments of the Indian market. With 84 constituents, the index covers approximately 85% of the Indian equity universe

MSCI Japan NR Index: MSCI Japan Index is designed to measure the performance of the large and mid-cap segments of the Japanese market. With 321 constituents, the index covers approximately 85% of the free float-adjusted market capitalization in Japan.

MSCI World 100% Hdg NR Index: MSCI World 100% Hdg NR Index is 100% hedged to the USD by selling each foreign currency forward at the one-month Forward weight. The parent index is composed of large and mid cap stocks across 23 Developed Markets (DM) countries<sup>\*</sup> and its local performance is calculated in 13 different currencies, including the Euro.

MSCI World ex-US Small Cap Index: MSCI World ex USA Small Cap Index captures small cap representation across 22 of 23 Developed Markets (DM) countries\* (excluding the United States). With 2,529 constituents, the index covers approximately 14% of the free float-adjusted market capitalization in each country.

MSCI World ex-US Small Growth Index: MSCI World ex USA Small Cap Index captures small cap representation across 22 of 23 Developed Markets (DM) countries\* (excluding the United States). With 2,529 constituents, the index covers approximately 14% of the free float-adjusted market capitalization in each country.

MSCI World ex-US Small Value Index: MSCI World ex USA Value Index captures large and mid cap securities exhibiting overall value style characteristics across 22 of 23 Developed Markets countries\*. The value investment style characteristics for index construction are defined using three variables: book value to price, 12-month forward earnings to price and dividend yield

MSCI World NR Index: The MSCI World Index is a free float-adjusted market capitalization index that is designed to measure equity market performance of developed markets.

# IMPORTANT INFORMATION

DATA AS OF DECEMBER 31, 2020

Multicurrency Category Average: Currency portfolios invest in US and foreign currencies through the use of short term money market instruments; derivative instruments, including and not limited to, forward currency contracts, index swaps and options; and cash deposits.

PHLX Gold & Silver Sector Index: The PHLX Gold/Silver Sector Index is a capitalization-weighted index composed of companies involved in the gold or silver mining industry

Russell 1000 Growth Index: The Russell 1000 Growth Index measures the performance of the large-cap growth segment of the US equity securities. It includes the Russell 1000 index companies with higher price-to-book ratios and higher forecasted growth rates. It is market-capitalization weighted.

Russell 1000 Value Index: The Russell 1000 Value Index measures the performance of the large-cap value segment of the US equity securities. It includes the Russell 1000 index companies with lower price-to-book ratios and lower expected growth rates. It is market-capitalization weighted.

Russell 2000 Growth Index: The Russell 2000 Growth Index measures the performance of small-cap growth segment of the US equity universe. It includes those Russell 2000 companies with higher price-to-value ratios and higher forecasted growth rates. It is market-capitalization weighted.

Russell 2000 Index: Russell 2000 Index is an index measuring the performance of approximately 2,000 smallest-cap American companies in the Russell 3000 Index, which is made up of 3,000 of the largest U.S. stocks. It is a market-cap weighted index.

Russell 2000 Value Index: Russell 2000 Value Index Fund seeks to track the performance of a benchmark index that measures the investment return of small capitalization value stocks.

Russell Midcap Growth Index: The Russell Midcap Growth Index measures the performance of the mid-cap growth segment of the US equity universe. It includes Russell midcap index companies with higher price-to-book ratios and higher forecasted growth rates. It is market-capitalization weighted.

Russell Midcap Index: The Russell Midcap Index measures the performance of the mid-cap segment of the US equity universe. It is a subset of Russell 1000 index and includes approximately 800 of the smallest securities based on a combination of their market cap and current index membership. The index represents approximately 31% of the total market capitalization of the Russell 1000 companies.

S&P 1500 Consumer Discretionary Index: S&P Composite 1500 Consumer Discretionary Index comprises those companies included in the S&P Composite 1500 that are classified as members of the GICS<sup>®</sup> consumer discretionary sector.

S&P 1500 Information Technology Index: S&P Composite 1500 Information Technology Index comprises those companies included in the S&P Composite 1500 that are classified as members of the GICS<sup>®</sup> information technology sector.

S&P 1500 REIT Industry Index: S&P Composite 1500 Real Estate comprises stocks included in the S&P Composite 1500 that are classified as members of the GICS<sup>®</sup> real estate sector.

S&P 1500 Utilities Index: S&P Composite 1500 Utilities Index comprises those companies included in the S&P Composite 1500 that are classified as members of the GICS<sup>®</sup> utilities sector.

S&P 500 Index: The index measures the performance of 500 widely held stocks in US equity market. Standard and Poor's chooses member companies for the index based on market size, liquidity and industry group representation. Included are the stocks of industrial, financial, utility, and transportation companies. Since mid 1989, this composition has been more flexible and the number of issues in each sector has varied. It is market capitalization-weighted.

S&P Global Infrastructure Index: S&P Global Infrastructure Index is designed to track 75 companies from around the world chosen to represent the listed infrastructure industry while maintaining liquidity and tradability. To create diversified exposure, the index includes three distinct infrastructure clusters: energy, transportation, and utilities.

# IMPORTANT INFORMATION

#### DATA AS OF DECEMBER 31, 2020
