# PARTICIPANT REPORT

**Current performance may be higher or lower than the performance stated due to recent stock market volatility. The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate and there is no assurance that the objective of any funds will be achieved. Mutual fund shares are redeemable at the then current net asset value and may be worth more or less than their original cost.**

Investors should carefully consider the investment objectives, risks, fees, charges and expenses before investing. This and other important information is contained in the fund prospectuses, which can be obtained from your financial professional, at [www.corebridgefinancial.com/retirementservices](http://www.corebridgefinancial.com/retirementservices) or by calling 1-800-428-2542 and following the prompts. Read the prospectuses carefully before investing.

The current 7-day yield as of December 31, 2022 for VANGUARD FED MONEY MARKET INV is 4.21%. This yield more closely reflects the current earnings of the money market fund than does the total average annual return. Yields do not reflect deduction of surrender charges or premium taxes, if applicable. You could lose money by investing in the Money Market Fund (Fund). Although the Fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the Fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Fund's sponsor has no legal obligation to provide financial support to the Fund, and you should not expect that the sponsor will provide financial support to the Fund at any time.

### **Important Information regarding Morningstar Ratings/Rankings:**

Mutual funds are classified according to Morningstar. Morningstar measures risk-adjusted returns and ratings reflect historical risk-adjusted performance. Morningstar % Rank in Category is the fund's total-return percentile rank relative to all funds that have the same category for the same time period. The highest (or most favorable) percentile rank is 1, and the lowest (or least favorable) percentile rank is 100.

### **Important Risk Disclosures**

Past performance is not a guarantee of future results. Investing involves risk, including the possible loss of principal. Generally, higher potential returns involve greater risk and short-term volatility. For example: Small-cap, mid-cap, sector and emerging funds can experience significant price fluctuation due to business risks and adverse political developments.

International and global funds can experience price fluctuation due to changing market conditions, currency values, and economic and political

## PARTICIPANT REPORT

climates.

High-yield bond funds, which invest in bonds that have lower ratings, typically experience price fluctuation and a greater risk of loss of principal and income than when investing directly in U.S. government securities such as U.S. Treasury bonds and bills, which are guaranteed by the government for repayment of principal and interest if held to maturity.

Interest rates and bond prices typically move inversely to each other; therefore, as with any bond fund, the value of an investment in this fund may go up if interest rates fall, and vice versa.

Mortgage-related funds' underlying mortgages are more likely to be prepaid during periods of declining interest rates, which could hurt the fund's share price or yield and may be prepaid more slowly during periods of rapidly rising interest rates, which might lengthen the fund's expected maturity. Investors should carefully assess the risks associated with an investment in the fund. Fund shares are not insured and are not backed by the U.S. government, and their value and yield will vary with market conditions.

The principal value of an investment in a target date fund is not guaranteed at any time including at or after the target maturity date. The target date is the approximate date when investors plan to start withdrawing their money. The fund will gradually shift its emphasis from more aggressive investments to more conservative ones based on its target date.

### Index Definitions

## PARTICIPANT REPORT

DATA AS OF DECEMBER 31, 2022

**Bloomberg Global Aggregate Index:** Bloomberg Global Aggregate - Corporate Index is a flagship measure of global investment grade, fixed-rate corporate debt. This multi-currency benchmark includes bonds from developed and emerging markets issuers within the industrial, utility and financial sectors.

**Bloomberg U.S. Aggregate Bond Index:** Bloomberg U.S. Aggregate Bond Index is an unmanaged index considered representative of the US investment-grade, fixed-rate bond market.

**Bloomberg U.S. Government Intermediate Index:** Bloomberg Intermediate US Government/Credit Bond Index is a broad-based flagship benchmark that measures the non-securitized component of the US Aggregate Index with less than 10 years to maturity.

**Bloomberg U.S. Government/Credit 1-3 Year Index:** Bloomberg US 1-3 Year Index measures the performance of investment grade, US dollar denominated, fixed-rate, taxable corporate and government-related debt with 1 to 2.9999 years to maturity. It is composed of a corporate and a non-corporate component that includes non-US agencies, sovereigns, supranationals and local authorities.

**Bloomberg U.S. Treasury Bill 1-3 Month Index:** Bloomberg U.S. Treasury Bill 1-3 Month Index is an unmanaged index considered representative of short-term US corporate and US government bonds with maturities of one to three years.

**FTSE U.S. Treasury-Bill 3-Month Index:** FTSE 3-Month Treasury Bill Index is an unmanaged index composed of three month Treasury bills.

**MSCI All Country World NR Index:** MSCI ACWI NR Index is designed to represent performance of the full opportunity set of large- and mid-cap stocks across 23 developed and 26 emerging markets.

**MSCI EAFE Growth Index:** MSCI EAFE Growth Index captures large and mid-cap securities exhibiting overall growth style characteristics across Developed Markets countries\* around the world, excluding the US and Canada.

**MSCI EAFE NR Index:** MSCI EAFE Index is designed to represent the performance of large and mid-cap securities across 21 developed markets, including countries in Europe, Australasia and the Far East, excluding the U.S. and Canada. It covers approximately 85% of the free float-adjusted market capitalization in each country.

**Russell 1000 Growth Index:** The Russell 1000 Growth Index measures the performance of the large-cap growth segment of the US equity securities. It includes the Russell 1000 index companies with higher price-to-book ratios and higher forecasted growth rates. It is market-capitalization weighted.

**Russell 1000 Value Index:** The Russell 1000 Value Index measures the performance of the large-cap value segment of the US equity
