The performance shown is net performance. The performance data quoted represents past performance. The Corebridge Fixed Account performance is based on current interest rates. Current performance may be higher or lower than the performance stated due to recent market volatility. Past performance does not guarantee future result. Investment return and principal value will fluctuate so an investor's shares, when redeemed, may be worth more or less than their original cost. Please visit [www.valic.com](http://www.valic.com) for recent month-end performance.

The Since Inception Return %'s are based upon the Inception Date of the fund and are provided as a substitute for any fund with less than a 10-year return.

The principal value of an investment in a target date fund is not guaranteed at any time including at or after the target maturity date. The target date is the approximate date when investors plan to start withdrawing money. The fund will gradually shift its emphasis from more aggressive investments to more conservative ones based on its target date. Some target date funds maintain a substantial allocation to equities both prior to and after the target date, which can result in greater volatility over shorter time periods. If an investor plans to retire significantly earlier or later than age 65, the funds may not be an appropriate investment even if the investor is retiring on or near the target date. Read the prospectus carefully before investing.

Mutual funds are classified according to Morningstar. Morningstar measures risk-adjusted returns and ratings reflect historical risk-adjusted performance. Morningstar % Rank in Category is the fund's total-return percentile rank relative to all funds that have the same category for the same time period. The highest (or most favorable) percentile rank is 1, and the lowest (or least favorable) percentile rank is 100. The Morningstar Star Rating is the Overall Star Rating and is derived from a weighted average of the performance figures associated with its 3, 5 and 10-year (if applicable) Morningstar Star Rating metrics. Morningstar Rating is for the A share class only - other classes may have different performance characteristics. Past performance is not a guarantee of future results.

You could lose money by investing in the Money Market Fund ("Fund"). Although the Fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the Fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Fund's sponsor has no legal obligation to provide financial support to the Fund, and you should not expect that the sponsor will provide financial support to the Fund at any time.

Generally, higher potential returns involve greater risk and short-term volatility. For example, small-cap, mid-cap, sector and emerging funds can experience significant price fluctuation due to business risks and adverse political developments. International and global funds can experience price fluctuation due to changing market conditions, currency values, and economic and political climates. High-yield bond funds, which invest in bonds that have lower ratings, typically experience price fluctuation and a greater risk of loss of principal and income than when investing directly in U.S. government securities such as U.S. Treasury bonds and bills, which are guaranteed by the government for repayment of principal and interest if held to maturity. Fund shares are not insured and are not backed by the U.S. government, and their value and yield will vary with market conditions. Interest rates and bond prices typically move inversely to each other; therefore, as with any bond fund, the value of an investment in this fund may go up if interest rates fall, and vice versa. Mortgage-related funds' underlying mortgages are more likely to be prepaid during periods of declining interest rates, which could hurt the fund's share price or yield and may be prepaid more slowly during periods of rapidly rising interest rates, which might lengthen the fund's expected maturity. Investors should carefully assess the risks associated with an investment in the fund.

Investors should carefully consider the investment objectives, risks, fees, charges and expenses before investing. Read the fund prospectuses carefully before investing. The fund prospectuses contain important information, which can be obtained from your financial professional at [corebridgefinancial.com/retirementservices](http://corebridgefinancial.com/retirementservices) or by calling 1.800.428.2542 and following the prompts.
